

Corrugated

What is Corrugated Lead?

A classic lead sheet that has been engineered into a wave structure. This pre-shaped design guarantees a tidy, weatherproof finish and saves time by fitting firmly over tiled or uneven roofs. It adds efficiency to lead's well-established durability and comes in plain, lacquered, or colour-coated varieties.

Where is it used?

- Solar flashing
- Dormers, valleys, and eaves
- Windows, roof lights and lanterns
- Ridges, soffits, and hips
- Any uneven or tiled roof surface

Why choose Corrugated Lead?

- Quick installation - no on-site pleating required
- Perfect fit - follows the curves of slate and tile
- Long-lasting - resistant to weather, water, and UV
- Workable - simple to solder, bend, and cut
- Sustainable - 100% recycled and recyclable
